WTC 4-Point Fan Hanger Installation – ZICO Bar

- Place the 4-Point Fan Hanger Assembly over the body of the ZICO Bar aligning the Cutout on the Hanger Assembly through the Handle on the ZICO Bar.
- Secure the Velcro closure on the bottom of the Hanger Assembly.
- Secure the (2) Velcro Safety Loops around the body of the ZICO Bar. Maintain enough slack in the safety loops so they do not interfere with the bars slide adjustment.
- The 4-Point Hanger Assembly Adjustment Straps should always hang over the “TOP” of the ZICO Bar.

Fan Hanger Hardware Kit Installation

- 1 Fan Hanger Hardware Kit is included with each 4-Point Fan Hanger.
- Secure the attachment hardware to the top of the ventilation fan as follows:
 - Hardware should be attached to the top outside corners of the fan.
 - Hold the hardware in place on the fan and mark each hole.
 - Drill a 3/16” hole at the four marked placements on the fan.
 - Secure the attachment D Ring with the provided 3/16” pan head bolt and 3/16” nylon lock nut.
 - D Rings should be attached flush with the top of the fan when in the folded down position.
